Thus after drifting to an icy death in 2001: A Space Odyssey, the body of astronaut Frank Poole is recovered in the outer reaches of the Solar System. Preserved at near absolute zero, it is a simple task for medical science a millennium hence to restore Poole to life--though strangely for a novel which pits religion against science, the metaphysical implications of technological resurrection are unexamined --and the first half is devoted to Poole's integration into the society of the future.
