Infections can cause inflammation of the brain ( encephalitis ). Viruses are the most common causes of encephalitis. Infections can also cause inflammation of the layers of tissue (meninges) that cover the brain and spinal cord—called meningitis. Often, bacterial meningitis spreads to the brain itself, causing encephalitis.

Cahoon used the game to teach staff about infection control. "We had used a "Jeopardy!" take-off game for a couple of years, and I thought it was time for a change," she says. The basket game is simple. Cahoon wrote questions on index cards and put them in a basket. Then she divided the staff into teams of about five people.
